Explain AND Show your work to prove your answer.

i disagree because if u do 45+16 and (40+10)(5+6) it'll equal the same "61" but if you do 45x16 you'll get 720 but if u do (40x10)+(5x6) that will equal 430 because that happens i disagree because u cant do place value with multiplication in multiplication u have to do all the numbers
