

Your Homework Helper Helper

Math homework can be as frustrating for parents as it is for kids, but you've got this, we promise! If your child is struggling, you can use any of the below questions to help elicit their best, most creative thinking. Ask them:

“How do you know?”

“Convince me.”

“Explain that, please.”

“Prove it.”

“Draw a picture.”

“Why?”

If your child is still stuck, let the teacher know. The teacher will be able to map out a plan to get your child exactly where they need to go.
